COMPANY

“We understand the **WHY** before we suggest the **WHAT**.” We are Legal and Compliance technology specialists. We are experts at delivering high-value business solutions within the Legal industry and regulated or risk-management sensitive environments.

We leverage our Legal, Compliance and Technology expertise to ensure effective content management; codified retention policies; and auditable Legal Hold processes to mitigate our customers’ e-Discovery risks.

SERVICES

Meeting the business needs of Legal and Compliance departments with technology solutions.

WHAT WE DO

We identify key content, email management and retention concerns as they relate to e-Discovery, and provide implementable solutions. We document, and then automate auditable legal hold processes.

Document & Email Management

Document and email management provides efficiency gains in the day-to-day operations of your business. For Corporate Legal and Compliance Departments, version and change tracking are even more crucial. In addition, well-planned categorization and retention policies serve as the basis for an effective e-Discovery program.

Retention & Archival

Codified retention policies for your company’s unstructured content (documents, spreadsheets, email, etc.) serve as the foundation of your e-Discovery & Legal Hold programs. Additionally, content preservation relies on the ability to quarantine, preserve in place or copy tagged ESI effectively without overburdening production systems.

Legal Hold Process Automation

Effective Legal Hold Management cannot be accomplished via policies alone. That’s because Legal Holds are not policies, they are **business processes**. In today’s ever-changing, always scrutinized regulatory environment, Legal Hold processes must be codified, audited and reportable at a moment’s notice.
